Swiftsend

Low-carbon, fast, reliable, and low-cost freight delivery for everyone

Hannah Shumway, Elizaveta Dorrer, Ricky Jinru Tian, Sze Fan Ng, Isabella Tasset

Swiftsend is an MTR startup that solves low-carbon, low-cost, fast, and reliable freight delivery – no trucks involved. To accomplish this vision, SwiftSend's ultimate goal is to start transporting cargo on MTR trains. In this way, the MTR could connect with the Greater Bay Area in the long term, transporting goods to and from nearby cities. SwiftSend provides faster and cheaper delivery for citizens, carbon footprint reduction for the whole planet, and extra revenue for MTR to keep delivering the best service.
