MTR GO

An expressway with lockers along its path for commuting that also provides daily necessities and meals ordered through an app

Soad Mana, Wing Hei Lam, Xiangyu Li, Reshad Rabbi, Caleb Othniel Vigknesvaran

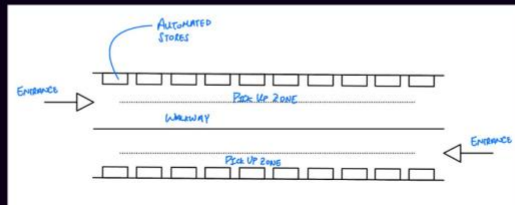

MTR GO introduces MTR Expressway, a platform providing necessary products through a convenient app integrated system with quick pick-up collection points. Automated stores are to be distributed along the MTR mall paths, designed as pick up zones. The service is easily deployable through the existing MTR app and simply provides daily necessities, products which can be picked up quickly throughout different malls and pick up station during a commuter's journey, saving time and enhancing convenience, avoiding the hassle of getting through crowds and having to fetch for the right products throughout the whole mall.
